

AORANE

Health Intelligence Platform

India's Most Comprehensive AI-Powered Health Platform

Targeting India's \$12B health-tech market with AI-first, privacy-first, India-first design

\$12B

India health-tech TAM 2026

53Cr

WhatsApp users in India

89%

Gross margin at scale

22

Users to break-even

The Opportunity in 3 Lines:

! 140 crore Indians have no affordable access to personalized health guidance.

! Existing apps are English-first, Western-food databases, no WhatsApp.

! AORANE is built from ground up for India — AI + WhatsApp + Indian foods + ₹149 pricing.

Ask:

Seed Round: ₹1.5 Crore (\$180K) for 18-month runway | Use: Marketing + Team + iOS + Infra scale

01. MARKET OPPORTUNITY

India's health-tech sector is at an inflection point

\$12B

India Health-Tech TAM 2026

28%

Annual Market Growth CAGR

500M+

Smartphone users in India

73%

Lifestyle disease increase (10yr)

Why Now — The Perfect Storm

2020 COVID health-consciousness 2x more Indians track health metrics than pre-2020
2020 corporate wellness only 10% of Indian employees had health insurance vs 40% corporates

Market Segments (SAM — Serviceable)

Segment	Size	ARPU	AORANE Fit
Urban health-conscious (B2C)	8 crore users	~300/month	Core product — AI tracking, premium plans
Tier 2/3 city expansion	15 crore users	~149/month	WhatsApp bot lowers barrier — no app needed
Corporate wellness (B2B)	2 crore employees	~60/user/mo	Business Portal — HR dashboard, bulk seats
Family health management	3 crore families	~999/family	Max Plan — 5 members, single billing
Senior citizen care	1.5 crore families	~499/month	Medicine reminders, vitals, family alerts

Competitive Landscape

Company	Funding	Valuation	AORANE Differentiation
HealthifyMe	\$75M raised	\$250M (2022)	Aorane: 80% cheaper + WhatsApp + NVIDIA AI + Indian privacy
1mg (Tata)	Tata owned	\$450M acq.	Aorane: Health tracking, not medicine delivery — complementary
PharmEasy	\$700M raised	Write-down	Aorane: Proactive wellness, not reactive medicine — different market
GOQii	\$60M raised	\$200M	Aorane: No hardware required + AI coach + corporate B2B play
Niramai	\$10M raised	Series B	Aorane: Broader — all health, not just diagnostics

02. PRODUCT & TECHNOLOGY

Full-stack AI health platform — production-ready

What We've Built (In Production)

Component	Status	Technology	Deployed At
Mobile App (Android)	' LIVE	Expo + React Native + TypeScript	Play Store — com.aorane.app
API Backend	' LIVE	Express.js + TypeScript + Drizzle ORM	https://aorane.onrender.com
Database	' LIVE	PostgreSQL via Supabase (18+ tables)	Supabase Singapore
Admin Panel	' LIVE	React + Vite + Tailwind CSS	Render Static Site
Business Portal	' LIVE	React + Vite + TanStack Query	Render Static Site
Landing Page	' LIVE	React + Vite + Framer Motion	Vercel / aorane.in
AI Integration	' LIVE	NVIDIA NIM (Llama 3.3 70B) + Gemini	API calls on demand
Payment System	' LIVE	Razorpay — subscriptions + one-time	Live with real transactions
Email/OTP System	' LIVE	Resend API + Fast2SMS + Twilio	Multi-channel OTP
APK CI/CD	' LIVE	Codemagic — GitHub push !' APK build	Auto-build on main push

AI Architecture — The Technical Moat

NVIDIA NIM API (Llama 3.3 70B) for health predictions, digital physiotherapy coaching, risk analysis.
PostgreSQL (18 tables) for user data, prescriptions, and audit logs. Analytics (90%) + Insurance (10%) + Medicine (10%)

Data Moat — Why We Become Harder to Replace Over Time

Every meal logged, personal food preferences model built. AI recommendations improve.
Copy data into wrong place means 100% stock loss (average 3-year contracts)

Technical Differentiation

Unique combination: NVIDIA AI + WhatsApp-first engagement + Indian food DB + DPDP compliance. No single competitor has all four. This creates a compound moat that gets stronger as user data grows.

03. BUSINESS MODEL & UNIT ECONOMICS

High-margin SaaS with multiple revenue streams

Revenue Streams

Revenue Stream	Current Status	Monthly Potential at Scale
B2C Subscriptions	LIVE	₹149 Basic / ₹499 Premium / ₹999 Max per user/month
B2B Corporate Plans	LIVE	₹999- ₹7,999/org/month (15-200 employees)
Pharmacy Affiliate	Coming Q3 2026	5-8% commission on medicine orders from app
Doctor Connect (commission)	Coming Q3 2026	20-30% commission on dietitian consultations
Insurance Partnerships	Coming 2027	Wellness data premium discounts — ₹500/user referral
ABDM Data Services	Coming 2027	Anonymized population health insights for govt/research

Unit Economics (Current)

Metric	Value	Notes
Variable Cost Per User/Month	₹2.72	AI API ₹1.87 + Email ₹0.80 + Storage ₹0.05
Revenue Per Premium User (Play Store)	₹347.88 net	After Play Store 15% + GST 18%
Revenue Per Premium User (Direct)	₹408.03 net	After Razorpay 2% + GST 18%
Contribution Margin Per User	₹345.16	Net revenue minus variable cost
Fixed Infrastructure Cost	₹7,552/month	Render + Supabase + Resend + Expo EAS + Domain
Break-even Users (Premium)	22 paying users	Fixed cost / contribution margin
Gross Margin at 500 paying users	~89%	Industry benchmark: SaaS averages 70-80%
LTV (Premium, 18-month avg retention)	₹6,213	18 months × ₹345.16 contribution
CAC (organic/referral target)	< ₹200	Current: ₹0 (pre-marketing phase)
LTV:CAC Ratio (target)	>30:1	Exceptional for SaaS — industry gold standard is 3:1

Revenue Projections (Conservative)

Metric	Year 1	Year 2	Year 3
Total Registered Users	5,000	25,000	1,00,000
Paying Users (25% conversion)	1,250	6,250	25,000
Avg Revenue Per Paying User	₹350/month	₹380/month	₹420/month
Monthly Recurring Revenue (MRR)	₹4.37L	₹23.75L	₹1.05Cr
Annual Recurring Revenue (ARR)	₹52.5L	₹2.85Cr	₹12.6Cr
B2B Clients (orgs)	10	50	200
B2B MRR	₹21,540	₹1.07L	₹4.30L
Total ARR (B2C + B2B)	₹54.1L	₹3.14Cr	₹14.8Cr
Estimated Gross Margin	82%	87%	89%
Est. EBITDA Margin	-40%	+25%	+55%

04. GROWTH STRATEGY

How we reach 1 lakh users — channel by channel

Growth Flywheel

- WhatsApp Bot Launch**
Zero friction food logging via WhatsApp. Viral — users share "my health bot" with friends. Cost: ₹10 per new user.
- Organic Referrals**
"Dost ko refer karo !" 1 month free Premium" program. Health is social — people track together. NPS-driven growth.
- Corporate Onboarding**
1 corporate client = 50+ new users. HR sends enrollment code. 100% captive audience. Best CAC = ₹10.
- Content Marketing**
WhatsApp health tips groups, Instagram reels, YouTube "know your calories" — Indian food focus. Builds trust.
- Doctor/Dietitian Partnership**
Dietitians recommend Aorane to patients. Referral commission ₹500/user. Trusted source for health-conscious segment.

Go-to-Market — 12-Month Plan

Quarter	Focus	Target	Key Milestone
Q2 2026	WhatsApp Bot + Barcode Scanner	1,000 users	First 50 paying users, MRR ₹17K
Q3 2026	Weekly Reports + Diet Chart	5,000 users	10 corporate clients, MRR ₹2L
Q4 2026	iOS Launch + Doctor Connect	15,000 users	50 corporates, MRR ₹8L
Q1 2027	ABDM Integration + Series A	30,000 users	100 corporates, ARR ₹2Cr

Why WhatsApp Changes Everything

WhatsApp = India's Default OS

53 crore Indians use WhatsApp daily. App install rate for health apps = 15%. WhatsApp bot engagement = 97% read rate.

With WhatsApp integration: DAU rate goes from 20% to 70%. Retention at month 3 goes from 25% to 65%. LTV doubles from ₹2,100 to ₹4,400 per user. This single feature changes our entire unit economics.

05. COMPETITIVE MOAT & RISK ANALYSIS

Why AORANE wins — and what could go wrong

Our Defensible Moats

Indian Food Database

Community-verified nutrition data for 500+ Indian dishes. Grows with every user. Competitors cannot replicate overnight.

WhatsApp-First Engagement

First health platform to deeply integrate WhatsApp for logging, reminders, and reports. Network effect: more users = better bot = more users.

DPDP Act Compliance

Built privacy-first from day 1. Corporates legally cannot onboard DPDP-non-compliant health apps after 2025.

NVIDIA AI Partnership Potential

Using NVIDIA NIM API — positioning for formal partnership as India NVIDIA ecosystem grows.

Personal Health Data Flywheel

More data logged !' better AI recommendations !' more engagement !' more data. Impossible to replicate without user history.

B2B Stickiness

Corporate clients sign annual contracts. HR dashboards become embedded in wellness reporting. High switching cost.

Risk Analysis & Mitigation

Risk	Likelihood	Impact	Mitigation
HealthifyMe launches India-first AI	Medium	High	WhatsApp moat + pricing moat (80% cheaper). They cannot match our unit economics.
NVIDIA API pricing increase	Low	Medium	Food cache reduces AI calls 85% by month 3. Open source LLM fallback ready.
Play Store policy change	Low	Medium	Direct APK + website subscription channel already built. Razorpay direct payments live.
DPDP Act new restrictions	Medium	Low	We are already over-compliant. New regulations hurt competitors more than us.
User data breach	Low	High	256-bit AES encryption, no PII in logs, Supabase enterprise security, audit trails.
Low conversion free !' paid	Medium	High	WhatsApp bot and weekly reports are paid-only features. Clear upgrade triggers.
Render.com outage	Low	Medium	Multi-region deployment planned for Scale stage. Currently Singapore region.

06. THE ASK — SEED ROUND

What we need, what you get, and why now is the right time

Current Traction (April 2026)

Seed Round Details

Raising: 11.5 Crore (\$180,000)

Instrument: SAFE / Convertible Note · Valuation Cap: 115 Crore · Discount: 20% at Series A

Runway: 18 months to profitability · Target MRR at 18 months: 115 Lakh+

Use of Funds

Category	Amount	% of Raise	What It Achieves
Marketing & User Acquisition	145L	30%	WhatsApp bot launch, Instagram/YouTube content, referral program seeding
Engineering Team (2 hires)	140L	27%	WhatsApp Bot engineer + iOS developer. 18-month salary
Product Development	125L	17%	Diet chart, barcode scanner, weekly reports, doctor connect, ABDM integration
Infrastructure Scale	120L	13%	Render upgrade, Supabase Pro+, CDN, monitoring, security audit
Legal & Compliance	110L	7%	DPDP certification, privacy audit, trademark, company setup
Operations & Buffer	110L	7%	Working capital, founder salary, miscellaneous ops

What Investors Get

Early investment of 15 Crore seed round is often comparable Indian healthtech seed valuations (~125-50Cr). Portfolio synergies with corporates, insurance companies in your portfolio can be our first clients

Exit Paths (3-5 Year Horizon)

Exit Path	Comparable	Potential Valuation
Strategic acquisition (Tata/Reliance health)	1mg acquired by Tata at \$450M	1200-500 Crore at 1L+ users
Insurance company acquisition	Star Health, HDFC ERGO	1100-300 Crore wellness data play
Series B + IPO track	HealthifyMe Series C at \$250M	1500Cr+ with 10L users
Government/ABDM partnership	ABDM platform integration	Revenue share on 50Cr+ ABHA holders
