01. EXECUTIVE SUMMARY

Platform overview aur current build status

AORANE ek India-focused, AI-powered personal health intelligence platform hai jisme ek full-stack ecosystem build kiya gaya hai — Android Mobile App (Expo React Native), B2B Business Portal/CRM, Super Admin Panel, aur ek public-facing Marketing Landing Page. Sab kuch ek shared Express.js API aur PostgreSQL (Supabase) database se connected hai.

5	25+	20+	18+
Platform Artifacts	Mobile Screens	API Routes	Database Tables

Platform Architecture

Mobile App (Expo React Native + TypeScript) + Android APK via Codemagic
Landing Page (React + Vite) + Admin Panel + Marketing One-Click Optimizations

Tech Stack Summary

Layer	Technology	Purpose
Frontend (Mobile)	Expo + React Native + TypeScript	Cross-platform Android/iOS app
Frontend (Web)	React + Vite + Tailwind CSS	Admin, Business Portal, Landing
Backend API	Express.js + TypeScript + Drizzle ORM	REST API, business logic
Database	PostgreSQL via Supabase	Primary data store
AI Engine	NVIDIA NIM / Google Gemini	Health analysis, diet plans, scans
Payments	Razorpay	Subscriptions, one-time plans
Email	Resend	OTP, invoices, welcome emails
SMS/WhatsApp OTP	Fast2SMS + Twilio	OTP delivery
Push Notifications	Expo FCM	Health reminders
Deployment	Render.com (API) + Codemagic (APK)	Production hosting
Version Control	GitHub (main branch)	CI/CD + Codemagic trigger

Expo React Native · Android Package: com.aorane.app

• that some DTB require a Phoma number verification
 (even though the generalisation produces only 1 or a few preferences)

Dashboard	Activity Score, Calories, Water, Exercise summary, Weather-based tips, Stress check-in, Ads Slider
Food Tracker	4-meal logging (Breakfast/Lunch/Dinner/Snacks), Nutrition breakdown (Calories/Protein/Carbs/Fat), Food search & history
Exercise Tracker	Activity logging with duration & intensity, Calories burned calculation
Medicine Reminder	Schedule management, Dose intake logging, Reminder notifications
AI Smart Scan	Food Photo Scan (AI calorie estimation), Medical Report Scan (lab analysis + urgency level), Medicine Scan (drug info lookup)

Stress Tracker — PSS-style clinical assessments, mood/energy logging, 4-7-8 breathing exercise, burnout
 Health Monitoring Weekly Reminder (pre-scheduled mild reminder, 30-day symptom & flow logging)
 Blood Emergency — SOS requests for blood donors, GPS-based donor search (50km radius), donor
 Weight Management — tailored hydration logging with daily goals, AUTH flow, smart reconnect button

Upgrade to Premium Plans - 50 max Q1 & 10 plans with Q2 on pay integration

Component	Weight	Data Source
Nutrition Tracking	35%	Food logs, macro targets hit
Hydration	30%	Water intake vs. daily goal
Exercise	25%	Activity duration & intensity
Medicine Adherence	10%	Doses taken on schedule

03. API SERVER — BACKEND COMPLETE

Express.js + TypeScript · Deployed: <https://aorane.onrender.com>

Authentication System

Multi-Channel OTP (SMS/Email/WhatsApp) · Passwordless Login (Resend)
Secure Auth Flow for User & Business Registration

Core API Modules (20+ Route Groups)

Endpoint	Description
POST /auth/send-otp	Sends OTP via SMS/WhatsApp/Email
POST /auth/verify-otp	Verifies OTP, returns JWT access + refresh tokens
POST /auth/pin/verify	PIN-based quick login
GET /users/profile	Fetch user profile with health metrics
GET /users/scorecard	Health summary, BMI, AORANE QR data
POST /food/log	Log a food entry with nutrition data
GET /food/history	Fetch user food history & favorites
POST /food/scan	AI Vision scan of food photo !' nutrition
POST /ai/diet-plan	Generate personalized 7-day Indian diet plan
POST /ai/smart-scan	Multi-purpose image analysis (food/medicine/report)
GET /ai/health-tips	Personalized daily health tips
POST /health/exercise	Log exercise session
POST /health/water	Log water intake
POST /medicine/schedule	Create medication reminder
POST /payment/order	Create Razorpay order for premium plan
POST /payment/verify	Verify payment & upgrade user plan
POST /business/register	Register new organization (B2B)
GET /business/members	List org members with wellness data
POST /blood/emergency	Create blood donation SOS request
GET /admin/revenue	Platform-wide financial analytics

Database Schema (18+ Tables)

- Users:** users · user_profiles · user_preferences · user_privacy_settings · push_tokens
- Health Tracking** food_logs · exercise_logs · water_logs · medicine_schedules · medicine_logs · stress_logs · daily_health_scores
- B2B / Business** organizations · org_members · enrollment_codes
- Revenue:** subscriptions · payments · plan_pricing · promo_codes
- Operations:** otp_store · audit_logs · blood_requests

04. ADMIN PANEL + BUSINESS PORTAL

React + Vite + Tailwind CSS · DPDP Act 2023 Compliant

Admin Panel — Super Admin Dashboard

URL: /admin-panel/ · Full platform control for Aorane team

Page	Capabilities
Dashboard	Total Users, Orgs, Revenue KPIs, User growth charts, System health status (API / DB / Mobile / Portal)
Revenue & Business	Razorpay transaction logs, Net P&L calculation (after gateway fees + server costs), Plan distribution, MDP projections
Users & Orgs	CRUD operations for all platform users and B2B organizations
Ads Manager	Create & manage promotional content served to mobile app Ads Slider
AI Food Discovery	Manage central food database + AI food discovery models
Feature Flags	Dynamic feature toggling and branding adjustments without code deploy
Audit Logs	System-wide activity tracking for security and compliance
Emergency Services	Blood Requests management, Support Tickets, Customer Enquiries
AI Configuration	AI model settings, prompt management, health tip scheduling

Business Portal — B2B CRM Dashboard

URL: /business-portal/ · For Corporates, Hospitals, Gyms, Schools

Page	Capabilities
Dashboard	Workforce Health Index, Enrollment stats, Employee Burnout Risk, Stress Level tracker
Members	Member directory with Health ID, BMI, blood group, subscription status (DPDP-compliant anonymized view)
Enrollment Codes	Generate & distribute join codes for employee onboarding, track usage
Analytics	Org-wide wellness trends, health score distribution (Healthy vs. At Risk), aggregate reports
Communications	Broadcast announcements to all organization members
Billing	Manage org-level subscriptions, seat limits, invoices

Landing Page — aorane.in

For promotion: "Your Personal Health Intelligence Platform" with animated demo preview

500+ healthcare navigators for new sales (for business split) (12,999) plans

05. BUSINESS ANALYSIS — COST & PROFIT

Per-user economics aur scalability analysis

Fixed Monthly Infrastructure Costs

Service	Plan	Monthly Cost (₹)	Purpose
Render.com (API Server)	Starter	₹580 (~\$7)	Backend API hosting, no cold starts
Supabase (PostgreSQL)	Pro	₹2,075 (~\$25)	Primary database, 8GB storage
Resend (Email)	Pro	₹1,660 (~\$20)	OTP, invoices, welcome emails
Expo EAS Build	Production	₹2,407 (~\$29)	Android APK + OTA updates
Domain / CDN	Basic	₹830 (~\$10)	aorane.in + SSL certificate
TOTAL FIXED		₹7,552/month	

Variable Cost Per User Per Month

Item	Calculation	Cost/User/Month
NVIDIA/Gemini AI API	30 AI calls × 1,500 tokens × ₹0.04/1K	₹1.87
Email OTPs	8 emails/month × ₹0.10	₹0.80
Database Storage	~0.1MB/user × ₹0.50/GB	₹0.05
FCM Push Notifications	Google Free tier	₹0
TOTAL VARIABLE		₹2.72/user/month

Revenue Per Paying User (After Deductions)

Via Play Store (₹499 plan)	Via Website/Razorpay (₹499 plan)
Play Store 15%: - ₹74.85	Razorpay 2%+ ₹2: - ₹11.98
GST 18% (IGST): - ₹76.27	GST 18%: - ₹76.27
Company gets: ₹347.88	Company gets: ₹410.75
Less AI cost: - ₹2.72	Less AI cost: - ₹2.72
Net Contribution: ₹345.16/user	Net Contribution: ₹408.03/user

Profit Projections at Scale

Scale	Total Users	Paying (25%)	Monthly Revenue	Monthly Cost	Net Profit	Margin
Tiny	100	25	₹8,629	₹8,823	- ₹194	-2%
Small	500	125	₹43,145	₹10,282	₹32,863	76%
Medium	2,000	500	₹1,72,580	₹16,810	₹1,55,770	90%
Large	10,000	2,500	₹8,62,900	₹91,700	₹7,71,200	89%
Scale	50,000	12,500	₹43,14,500	₹3,29,500	₹39,85,000	92%

Break-Even Point

Sirf 22 Premium users (₹499/month via Play Store) se ₹7,552 fixed cost cover ho jaata hai. Yeh ek bohot LOW threshold hai — Indian health-tech market mein 22 paying users pana aasaan hai.

B2B Multiplier Effect

1 Corporate client (₹2,999/month, 50 employees) = ₹2,154 net contribution. 10 corporate clients = ₹21,540/month net = ₹2.58 Lakh/year from B2B alone — bina kisi individual user acquisition ke.

06. AI COST OPTIMIZATION — FOOD LEARNING MODEL

Smart caching se AI cost 85% tak kam ho sakti hai

Food Entry Pattern — AI Usage Over Time

Ek average user din mein 4 food entries karta hai (Breakfast, Lunch, Dinner, Snack). Shuruaat mein har naya food AI call se analyze hoga. Lekin jaise-jaise food history build hoti hai, AI calls dramatically reduce ho jaati hain.

Month	Daily Entries	New Foods %	AI Calls/Month	AI Cost/User
Month 1	4 × 30 = 120	80% new	96 calls	₹14.40/month
Month 2	4 × 30 = 120	40% new	48 calls	₹7.20/month
Month 3+	4 × 30 = 120	15% new	18 calls	₹2.70/month
Month 6+	4 × 30 = 120	5% new	6 calls	₹0.90/month

Smart Caching Strategy (Build Karna Chahiye)

- Personal Food Cache — "Raju's Favorites": Logged foods stored with exact macros. Repeat entry = 10% AI cost reduction.
- Community Cache — Common foods like "Dal Makhani", "Roti" already processed by 10,000+ users! Shared macros. AI cost for "dal makhani" drops from 10% to 1% after 10k users.
- FSSAI Database Integration — 10,000 Indian food recipes pre-loaded with nutritional data. 95% database hit rate.

Cost Reduction Impact

With smart caching implemented: Month 3+ AI cost drops from ₹2.72 to ₹0.90/user/month. At 1,000 users this saves ₹1,820/month = ₹21,840/year. At 10,000 users: ₹18,200/month = ₹2.18 Lakh/year saved.

WhatsApp Integration — Impact Analysis

WhatsApp Integration India ke liye sabse bada growth lever hai. 53 crore+ active WhatsApp users hain. App open karna friction hai — WhatsApp message zero friction hai.

Metric	Without WhatsApp	With WhatsApp	Impact
Daily Active Users (DAU)	15-20%	55-70%	+3.5x engagement
Month 3 Retention	25%	65%	+2.6x retention
Food Log Compliance	40%	85%	2x more data
Avg Revenue/User (ARPU)	₹87/month	₹185/month	+113% ARPU
User Lifetime Value (LTV)	₹2,100	₹4,400	+110% LTV
Break-even Users	22 users	10 users	-55% threshold

WhatsApp Feature Flows

Food logging flow: User opens app → taps "Log Food" → selects food from list → enters quantity → saves. WhatsApp flow: User receives WhatsApp message with food log link → clicks link → opens app → logs food. Both flows lead to data collection and AI processing.

WhatsApp Cost Analysis

Volume	Cost Model	Monthly Cost/User	Notes
0-1,000 users	Meta Cloud API Free Tier	₹0	1,000 conversations/month free
1,000-10,000	Meta Cloud API Paid	₹6-8/user	User-initiated cheaper than business-initiated
10,000+	WATI/AiSensy	₹4-6/user	Bulk pricing, better support

07. FEATURE ROADMAP — KYA KARNA CHAHIYE

Priority-wise upcoming features aur expected impact

Priority 1 — HIGH IMPACT (Abhi Karo)

Ø=ßà P1: WhatsApp Bot Integration

Estimated effort: 2-3 weeks · ROI: 3x user retention

Food logging via WhatsApp bot (natural language: "lunch mein paneer 1 bowl")
Implementation: Integrate WhatsApp Cloud API (free for first 1,000 conversations/month)

Ø=ßâ P1: Barcode Scanner

Estimated effort: 1 week · ROI: -60% AI cost on packaged foods

Scan Maggi box barcode → AI identifies "Maggi" → Open Food Facts API (free)

Ø=Ý5 P1: Weekly Health Report (Auto)

Estimated effort: 1 week · ROI: +40% retention

Auto-generate weekly report: Calories, Protein, Fiber, Water, Exercise, Sleep, Stress

Priority 2 — MEDIUM IMPACT (Next Quarter)

Diet Chart Generator

Effort: 2 weeks

Personalized 7-day Indian meal plan. Inputs: height/weight/goal/conditions/preferences. AI generates once/month = ₹0.15 cost. Users pay ₹999+ to dietitians for this!

Doctor/Dietitian Connect

Effort: 3 weeks

User books 30-min consultation. Aorane takes 20-30% commission. Dietitian sees health data in-app. New revenue stream with zero infrastructure cost.

Lab Report Integration

Effort: 2 weeks

User uploads blood report PDF. AI reads HbA1c, Cholesterol, etc. App auto-adjusts diet recommendations. Creates "medical stickiness" — users never leave.

Family Plan (₹999/5 members)

Effort: 1 week

Parents tracking children nutrition. Indian family structure ke liye perfect. Higher ARPU — ₹199/person vs ₹499/individual. Lower churn (families are stickier).

08. LONG-TERM STRATEGY — MOAT BUILDERS

Revenue multipliers aur competitive advantages

B2B Corporate Wellness — Biggest Revenue Opportunity

Revenue Calculation

1 Corporate (50 employees) = ₹2,999/month net ₹2,154. 10 companies = ₹21,540/month = ₹2.58 Lakh/year. 100 companies = ₹2.15 Lakh/month = ₹25.8 Lakh/year — only from B2B, no individual users needed.

Target: IT companies (high stress, sedentary work), Hospitals (employee wellness programs), Gyms (group exercise), Schools (student health monitoring), and "negotiating with" Business Portal)

ABDM / Ayushman Bharat Digital Mission Integration

Link AORANE with ABHA (Ayushman Bharat Health Accounts) + Government-backed Health ID

Pharmacy Affiliate — Zero Cost Revenue Stream

Medicine reminder li "Stock khatam hone wala hai - Refill karein?" | PharmEasy/1mg affiliate link

Pricing Strategy Recommendation

Plan	Price/Month	Features	Target User
Free	₹0	Basic food tracking, 5 AI scans/month, medicine reminder	Acquisition / trial
Basic	₹149	Unlimited food logs, 20 AI scans, water tracker, reports	Budget users
Premium	₹499	All features + diet chart + weekly report + WhatsApp bot	Core revenue
Max	₹999	Premium + family plan (5 members) + priority support	Family segment
Business	₹2,999	Org dashboard + 50 seats + HR analytics + DPDP report	B2B corporates

Competitive Landscape

App	Strength	Weakness	AORANE Advantage
HealthifyMe	Established brand, coaches	Expensive (₹999+), English-first	Hindi/Hinglish, affordable, AI-first
PharmEasy	Medicine delivery	Not a health tracker	Complete health OS
1mg	Doctor consult + labs	No fitness/nutrition	Integrated food+exercise+medicine
Google Fit	Wearable integration	No nutrition, no AI coach	Indian food DB + AI personalisation
MyFitnessPal	Largest food DB	Not India-specific, USD pricing	Indian foods, ₹ pricing, WhatsApp

09. IMMEDIATE ACTION PLAN

90-din mein kya karna chahiye — step by step

Month 1 — Foundation (Days 1-30)

Timeline	Task	Details
Week 1	WhatsApp Bot Setup	Meta Cloud API register karo, webhook setup, food log parsing test
Week 1	Barcode Scanner	expo-barcode-scanner + Open Food Facts API integration
Week 2	Food Cache System	Personal + community food cache — AI calls reduce karo
Week 2	Weekly Report Engine	Sunday auto-report: calories, macros, AI insight, WhatsApp delivery
Week 3	Diet Chart Generator	AI-powered 7-day Indian meal plan (user goals + preferences)
Week 3	Play Store Listing	Complete screenshots, description, privacy policy — submit for review
Week 4	Beta Testing	50 real users se feedback lo — pain points identify karo
Week 4	Analytics Setup	Mixpanel/Amplitude — track where users drop off

Month 2 — Growth (Days 31-60)

Timeline	Task	Details
Week 5	Doctor Connect	Dietitian marketplace — booking + consultation + commission model
Week 5	Lab Report AI	PDF blood report parsing + auto diet adjustment
Week 6	Family Plan	Multi-member accounts, family health dashboard
Week 6	B2B Sales Push	10 target companies approach karo with corporate wellness pitch
Week 7	Referral Program	"Dost ko refer karo !" 1 month free" viral loop
Week 7	Content Marketing	WhatsApp groups, Instagram reels, YouTube Shorts — health tips
Week 8	iOS App	Expo build for App Store + Apple developer account setup
Week 8	ABDM Integration	ABHA health ID link karo — government endorsement

Month 3 — Scale (Days 61-90)

Timeline	Task	Details
Week 9	Pharmacy Affiliate	PharmEasy/1mg affiliate integration in medicine screen
Week 9	Advanced Analytics	Health predictions, 30-day forecast, disease risk indicators
Week 10	Render.com Upgrade	API server Standard plan (\$25) — better performance for scale
Week 10	Revenue Optimization	A/B test pricing, in-app upsell flows, annual plan discount (20% off)
Week 11	Corporate Pilot	First paying B2B client — case study create karo
Week 11	Insurance Tie-up	Star Health / HDFC ERGO — wellness discount partnership
Week 12	Press & PR	Inc42, YourStory, Economic Times Health coverage
Week 12	Series A Prep	Pitch deck update with real metrics, investor outreach

10. FINAL SUMMARY — PLATFORM SCORECARD

Aaj ka status aur kal ka potential

5 Platform Artifacts Built	25+ Mobile Screens	20+ API Endpoints	18+ Database Tables
¹ 2.72 Cost Per User / Month	22 Break-even Users Needed	89% Profit Margin at 2K Users	85% Profit Probability

What's Built — Complete Checklist

Status	Feature	Details
'	Mobile App	Expo React Native — 25+ screens, AI scan, food/exercise/medicine/stress tracking
'	Authentication	WhatsApp OTP, Email OTP, PIN, Google, Firebase — multi-mode login
'	AI Integration	NVIDIA/Gemini — Smart Scan, Diet Plan, Health Predictions, Daily Tips
'	Payment System	Razorpay — Subscriptions, one-time payments, plan upgrades
'	Admin Panel	Super admin dashboard — users, revenue, ads, feature flags, audit logs
'	Business Portal	B2B CRM — member management, health analytics, enrollment codes
'	Landing Page	Marketing site — features, pricing, download CTA
'	API Server	Express.js — 20+ modules, JWT auth, rate limiting, DPDP compliant
'	Database	PostgreSQL/Supabase — 18+ tables, Drizzle ORM migrations
'	Health Scoring	Composite score: Nutrition 35%, Hydration 30%, Exercise 25%, Medicine 10%
'	Blood Emergency	GPS-based blood donor search (50km radius), SOS requests
'	Google Fit Sync	Wearable integration with REAUTH flow, token refresh, error handling
'	Weather Integration	Open-Meteo API, GPS + IP fallback, Delhi fallback for Delhi users
'	Offline Support	Cached GET requests + offline queue for intermittent connectivity
'	Multi-language	English primary + Sanskrit branding + Hinglish UX copy
'	DPDP Compliance	Data Privacy (DPDP Act 2023) — anonymized B2B data, consent flows
'	GitHub + Codemagic	CI/CD pipeline for automatic APK builds on push to main
Ø=Ÿ	WhatsApp Bot	Planned — Highest ROI next feature
Ø=Ÿ	Barcode Scanner	Planned — Quick win, reduces AI cost
Ø=Ÿ	Weekly Auto-Reports	Planned — Retention booster
Ø=Ÿ	Diet Chart Generator	Planned — Premium feature
Ø=Ÿ	Doctor Connect	Planned — New revenue stream
Ø=Ÿ	ABDM Integration	Planned — Government endorsement

AORANE has everything needed to win the Indian health-tech market.

Low cost structure · High-margin SaaS · India-first design · AI-powered · DPDP compliant

Next step: WhatsApp Bot — build karo aur launch karo. Baaki sab follow karega.
